Adding new hooks
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2674
Slightly reduce ERC721 deployment gas cost
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2665
General meta-data container contract
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2663
Ownable should support setting the initial owner through its constructor
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2639
TransparentUpgradeableProxy could be optimized by making admin immutable
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2638
Consider changing isContract check to use address.code.size > 0.
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2634
Proposal to deprecate ERC777 implementation
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2620
ERC721 payable transferFrom
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2610
Improve Cryptography test clarity to showcase how signatures are generated
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2600
Clarify role of MinimalForwarder
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2598
Reduce Error Message size in SafeCast.sol
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2590
Extending from ERC20Capped and minting inside constructor gives compiler err
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2580
Make some private functions internal to allow the development of "withSignature
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2567
The documentation of toEthSignedMessageHash makes no sense for me
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2545
Add EIP1363 Payable Token support (ERC20 extension)
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2544
Use immutable variable to store beacon address in BeaconProxy
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2538
New proxy design: VTable / Diamond / Router proxy
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2537
ERC1155Supply, an extension that keep track of totalSupply for ERC1155 token
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2536
Monitor gas changes through GitHub checks
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2509
private vs internal and public vs external
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2507
Consider changing library function call syntax we use
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2484
Adding internal function to set the owner of Ownable
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2463
Include a TokenRecover contract
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2461
ERC20Snapshot: add getting balanceOfAt using block number
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2460
Include a RewardDistribution Contract
https://github.com//OpenZeppelin/openzeppelin-contracts/issues/2457
